11 September 2020

Dear Families

As part of our science topic Animals: including Humans that we are doing this term, we are going to be looking at human growth. This will encompass looking at the changes to the body during puberty. This will not be addressing sexual relationships that get taught in Year 6 but will look at the changes that girls and boys undergo between the ages of 10 and 18 which will include teaching the children about periods in girls and that in boys, testicles start to produce sperm.

If you do not wish your child to partake in these discussions, please return the slip below by Friday 25 September 2020.

Kind regards

Mrs Jarvis

Year 5 Science Topic: Animals including Humans Permission Slip

I/we do not want our child _____ to partake in the science lesson about changes to the body during puberty.
