

# Maths Intent

At St Peter and St Paul primary school we see maths as an essential life skill and place great value on its role within both our curriculum and our everyday lives.

Our staff strive to develop children's independence, confidence and resilience within the subject. We foster a culture whereby mistakes are used as learning opportunities to further their knowledge and understanding. We value perseverance in maths and celebrate our children's successes.

We recognise that each child's journey of arithmetic and reasoning is different and therefore adapt our teaching and support learning to meet all needs and ensure progress is made. We aim for our children to have a secure understanding of place value and number facts at their level on which to build their future maths knowledge.

By the time our children leave our school, they will feel proud of their maths journey and will be equipped with the knowledge and understanding for the next stage of their education. They will also recognise that the skills they have learned in maths are transferable and will go on to use these throughout their future lives.
